DETAILED ACTION

In Amendment and Response to Election and Restriction of Specie Requirement, Applicants elect without traverse Specie I, 1- 9, draw to Method for manufacturing a carbon nanotube semiconductor device having the step of forming third gate electrode before forming carbon nanotube layer (figs. 2A-4D).

Applicants add new claim 18.

Claims 1- 9 and 18 are pending in this application.

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

a) **Species I, e.g. claims 1- 9**, draw to Method for manufacturing a carbon nanotube semiconductor device having the step of forming third gate electrode overlapping with the first and second gates before forming carbon nanotube layer by utilizing a solution containing a carbon nanotube with conductor property and a carbon nonotube with semiconductor property.

b) **Species II, e.g. claim 18**: Method for manufacturing a carbon nanotube semiconductor device having the step of forming the third gate electrode adjacent to the first and second gates after forming carbon nanotube layer by using a solution containing a carbon nanotubes.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claims is finally held to be allowable. Currently, no claim is generic. Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that all claims are generic is considered non-responsive unless accompanied by an election.

3. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. 1.141. If claims are added after the selection, applicant must indicate which are readable upon the elected species. M.P.E.P. 809.02(a). Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103 of the other invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filled petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(h).
